Nicholas Rohrmoser

Graduate Software Engineer

I am a recent graduate from the University of Hertfordshire with a Bachelors degree in Computer Science & Information Technology (First Class). I have experience with multiple coding languages including Python, C++ and most notably Java. I also have experience in SQL. I am also eager to learn other languages in the future.

I am motivated and eager to learn new skills that will help broaden my knowledge in the software engineering world. I believe I will be an asset to any organisation to which I am affiliated. I always give my best to the task at hand and would love to add value to your workspace.

Experience

- **Ad hoc basis General Maintenance Worker**
  Eagle Projects 01/2021-12/2021
  Subcontractor on an ad hoc basis performing general tasks as and when required. Delivery and collections included.

- **Full time Seasonal Sales Assistant**
